WHEEL CARRIERS

- WHEELONE **A** & WHEELONE **D**
- WHEELDOUBLE
- WHEEL EASY

EN Takler spare wheel carriers are engineered to provide maximum stability and ease of use. Available in **single** or **double** configurations, our systems are offered with either a **fully welded structure** for immediate rigidity or as **ready-to-assemble components** for streamlined installation. The system is completed by an operating handle treated with a special **Zinc-Nickel sealant**. This advanced finish is specifically designed to prevent and fight corrosion, ensuring flawless mechanical performance even in the most demanding road environments.

IT I portaruota Takler sono progettati per offrire massima stabilità e praticità nella gestione della ruota di scorta. Disponibili in configurazione **singola** o **doppia**, i nostri sistemi possono essere forniti con **struttura saldata** per una solidità immediata o in **componenti separati** pronti per un montaggio rapido. Il sistema è completato da un manettino a leva con speciale trattamento in **Zinco-Nickel sigillante**, una finitura d'avanguardia studiata per prevenire e combattere la corrosione anche nelle condizioni più gravose.

WheelOne a
